The Smart Way

A Simple
Precise
Solution

time, money, energy

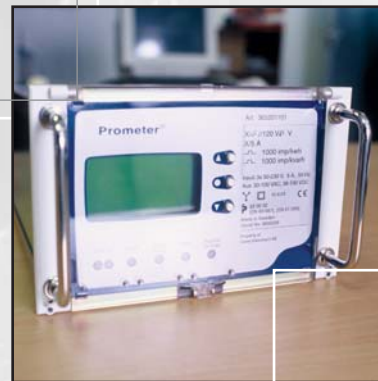

Used efficiently and effectively, they all make a successful company.

Wasting your Energy...

The introduction of legislation has had a huge impact on companies in the industrial building sectors. The Climate Change Levy and Part L of the Building Regulations means that without the ability to monitor and manage energy efficiently and precisely, you could be losing substantial amounts of money on your energy bills.

Wasting your money

The legislation imposes ever-tighter controls on energy usage, and for companies who have not yet established energy policy, should consider acting immediately before they have to waste any more money. Discover how B&S can help you effect this change.

So Don't Waste Any More Time.

The B&S Management system offers a cost effective solution enabling the customer to take control of their energy. From measurement, logging and control hardware through to analytical and reporting software B&S are there to help you reduce the impact.

Take Control of your Time, Money and Energy

The B&S Management software offers a non-meter specific solution for automatic data collection of energy consumption. The data can be saved, presented on-line as graphics and text, exported in excel format. analysed graphically, and presented in report format using Crystal Report Writer.

The B&S Management hardware is fully TCP/IP compatible, offers analogue, GSM, radio/wireless communication options, and together with it's multi site configuration provides a powerful solution from metering point to presentation.

Powerful Partnerships

By working hand in hand with our clients B&S offer a custom solution specific to their needs. From site survey, design, manufacture, installation, commissioning and technical on line support, B&S provide a complete support service.

Working alongside our partners together we aim to

- Increase energy efficiency
- Reduce energy consumption
- Manage energy effectively
